

ProBridge Launches New AI Labs Solution Following EDGE26 Debut

ProBridge’s newest solution gives credit unions a safe way to build, test and implement custom AI solutions without putting their environments or member data at risk.

Tampa, FL – June 2, 2026 – ProBridge, a wholly owned subsidiary of Trellance Cooperative Holdings, Inc., has officially launched AI Labs, a new solution now available to existing and prospective ProBridge clients.

First introduced at EDGE26, AI Labs is a sandbox environment where credit unions can build, test and scale custom AI solutions without risking their environments. It operates with documented guardrails aligned to NCUA, GLBA and internal risk frameworks to help meet regulatory requirements. With AI Labs, credit unions get:

- Production-ready AI use cases
- Built-in compliance & risk controls
- Reusable AI frameworks & accelerators
- Enablement of internal teams

“AI is becoming increasingly important for credit unions working to meet evolving member needs and compete with larger financial institutions,” said Asha Connors, Executive Director at ProBridge. “We wanted to give credit unions a safe place to build their own custom solutions. AI Labs was born from that goal, giving them a way to securely prototype use cases without putting their data or environments at risk.”

AI Labs is available now through ProBridge. Visit the [AI Labs webpage](#) to learn more and download the one-pager.

About ProBridge

ProBridge is a specialized talent services provider that seamlessly integrates their top-tier talent into existing teams. ProBridge’s bench of talented tech and other industry professionals are ready and able to provide the expertise and skills needed to scale efficiently and achieve business objectives. As your partner in growth, ProBridge can help your organization be as productive and cost effective as possible, allowing you to create more value for your clients.
